PROFESSIONAL SUMMARY

Full Stack Developer focused on React, TypeScript, Node.js, and PostgreSQL, with experience building secure, production-ready web applications. I developed Budgetivo, a full stack financial management platform featuring hybrid authentication, role-based access control, multilingual support, and independent frontend/backend deployment. I also bring more than 10 years of experience in demanding corporate environments, working with performance indicators, incident resolution, and high-volume operations, combining technical capability with professional maturity and business awareness.

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, HTML5, CSS3.
- Frontend: React, Hooks, Context API, Axios.
- Backend: Node.js, Express.js, REST APIs.
- Database: PostgreSQL, MongoDB, Prisma, Mongoose.
- Tools: Git/GitHub, JWT, Bcrypt, Google OAuth, Vercel, Render, Netlify, Supabase.

KEY PROJECTS

Budgetivo | Full Stack Developer

Multi-user full stack financial management platform with hybrid authentication, role-based permissions, reporting, and independent frontend/backend deployment.

- Built Budgetivo from scratch, a full stack financial management application based on a PERN architecture, using React 19, Express 5, PostgreSQL, Prisma, and TypeScript to support a scalable, production-ready foundation.
- Implemented hybrid authentication with local login and Google OAuth, securing access through JWT and role-based permissions to strengthen security, access control, and readiness for real-world usage.
- Designed collaborative account workflows with member management, invitations, transactions, savings goals, audit logs, and analytical dashboards, expanding the product from a simple finance tracker into a multi-user platform with Excel reporting.
- Integrated external services such as Cloudinary for avatar management and EmailJS for contact flows, while also supporting Portuguese, English, and Spanish to improve usability and real-world readiness.

Backend Repo: <https://github.com/pablovqueiroz/finance-tracker-pern-server>

Right On Time (ROT) | Full Stack Developer

- Developed a MERN application with full CRUD operations and secure JWT-based authentication, structured for use in a production environment.
- Built REST APIs with Node.js and Express to manage protected data and business logic.
- Modeled data in MongoDB with Mongoose, ensuring consistency, validation, and scalability.
- Deployed frontend and backend independently on Vercel and Render, ensuring environment separation and application stability.

Live Demo: <https://rot-right-on-time.vercel.app>

Frontend Repo: <https://github.com/pablovqueiroz/rot-frontend>

Backend Repo: <https://github.com/pablovqueiroz/rot-backend>

Harry Potter App | Full Stack Developer (Collaborative)

- Developed React components with dynamic routing and external API integration.
- Collaborated using Git and a branch-based workflow in a shared development environment.

Live Demo: <https://harry-potter-react-app.netlify.app>

GitHub Repo: <https://github.com/andresgonzalezperez/harry-potter-react-app>

Recipe Book App (I'm Hungry) | Frontend Developer (Collaborative)

- Developed a responsive React interface using reusable components and external API integration.

Live Demo: <https://im-hungry-app.netlify.app>

GitHub Repo: <https://github.com/pablovqueiroz/recipe-book-app>

PROFESSIONAL EXPERIENCE

Commercial & Customer Support Assistant | 2019 – 2025 | MEO (Altice Portugal)

- Managed customer acquisition and retention processes in a high-volume telecommunications environment, ensuring service quality and consistent contribution to retention and satisfaction targets.
- Acted as a focal point for operational incident resolution, maintaining performance indicators and strengthening my ability to prioritize, analyze problems, and respond under pressure.
- Provided technical and commercial after-sales support, ensuring efficient issue resolution and consistent achievement of operational targets.

Project Draftsman | Rio de Janeiro, Brazil | 2013 – 2019 | Alfatec Cozinhas

- Developed technical designs for stainless steel furniture for professional kitchens, ensuring alignment between technical specifications and production requirements.
- Collaborated with manufacturing teams to ensure precision, functionality, and compliance with technical standards.
- Improved the organization of technical documentation, optimizing workflow efficiency.

Administrative Assistant | Rio de Janeiro, Brazil | 2011 – 2013 | Vega Comunic. LTDA

- Managed client accounts and financial operations, including accounts payable and receivable.
- Maintained and updated internal systems, ensuring data accuracy and administrative efficiency.
- Coordinated order, pickup, and delivery logistics, improving organization and deadline compliance.

EDUCATION

- Postgraduate Program in Software Engineering | Anhanguera (Expected 2026)
- Web Development Bootcamp | Ironhack (Completed Jan 2026)
- Marketing Technology | Universidade Estácio de Sá (Brazil)

LANGUAGES & AVAILABILITY

- Languages: Portuguese (Native C2) | English (Intermediate B2).
- Availability: Immediate.
- Work Preference: Available for On-site/Hybrid roles in Porto area; Remote for all other locations (Portugal/EU).
